

# CAPABILITIES AND CUSTOM OPTIONS

## POWER ELECTRONIC CAPACITORS

| Main Application                              | Advantage                            |
|---|--------------------------------------|
| DC-Link and DC-Filter for traction converters | • Shock and vibration proof          |
|   | • High ripple current                |
|   | • Low inductance                     |
|   | • High reliability and long lifetime |
| DC-Link for industrial converters             | • High ripple current                |
|   | • Low inductance                     |
|   | • High reliability and long lifetime |

### SPECIALTY DEVICES

| Design Advantage             | Application  | Series  |
|------------------------------|--------------|---|
| Low Inductance               | Traction     | <a href="#">HDMKP</a>  |
| Space saving, compact design | Power supply | <a href="#">GLI</a>    |
| High impulse capability      | Welding      | <a href="#">DCMKP</a>  |

### CUSTOM OPTIONS

| Capabilities                                       |
|--|
| Connections – inserts or bolts                     |
| Form – width and height                            |
| Electrical parameters                              |
| Threaded stud (bottom of container) can be removed |
